

ENZYMATIC FORMULATIONS

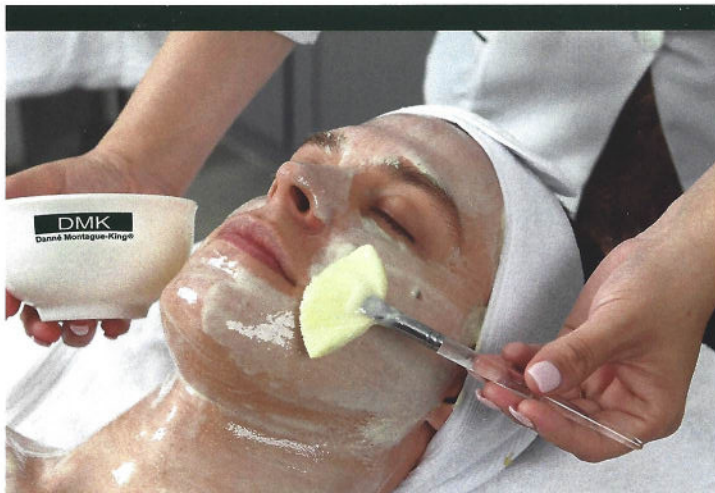

The DMK system has 3 enzyme formulas for the face and a separate formula for the body. The enzymes in each of these sophisticated formulas act as hormone-like messengers to provide an immediate response within the skin. DMK enzymatic formulations provide truly effective skin revision, enabling optimal cellular function which is the key to youthful, healthy skin.

To determine the appropriate combination of treatments and products, ask your certified DMK technician for a complete skin diagnosis.

HOW AND WHY ENZYMES WORK

Enzymes are nature's biological catalyst. They effectively:

- Hydrolyze dead cells
- Increase oxygenation
- Boost cellular energy and activity
- Encourage new collagen and elastin formation
- Flush out cellular waste and debris

Remove Rebuild Protect Maintain

DMK SKIN REVISION™ TREATMENTS

By combining state-of-the-art botanical science with innovative technology, DMK has created one of the most advanced skincare systems available. The DMK Skincare™ systems include a range of unique enzyme treatments that work with the skin rather than merely acting on it. The treatments focus on what the skin really responds to - what really works! DMK Home Prescriptives are essential to maintaining your skin between treatments.

RESOLVES CONDITIONS LIKE:

- ✓ ACNE
- ✓ AGING
- ✓ PIGMENTATION
- ✓ SCARRING

MUSCLE BANDING WITH ENZYMES

DMK Muscle Banding Treatments incorporate all 3 enzyme masques, which are highly effective in repairing and strengthening tissue. They also contain powerful antioxidants to fight the harmful effects of free radicals which cause premature aging.

Using a combination of enzymes, this treatment is specifically designed to:

- Progressively strengthen the facial muscles
- Strengthen fragile capillaries
- Help reverse the signs of aging

True oxygen therapy begins inside the skin and the DMK Enzyme Treatments are well known for their plasmatic oxygen enriching abilities. The DMK concept of skin revision provides the energy, nutrition and support cells needed to regenerate healthy, vibrant skin.

REMOVE. REBUILD. PROTECT. MAINTAIN.™

DMK's Remove. Rebuild. Protect. Maintain,™ concept of skin revision has earned international recognition and endorsement from the medical profession.

DMK'S PLASMATIC EFFECT™

DMK's Enzyme therapy provides the incredible world renowned Plasmatic Effect™. The visible network of dilated capillaries delivers oxygen and nutrition into the skin, while the lymphatic system flushes away impurities and cellular waste, leaving behind a clean, clear matrix, renewed energy to the cells and a vibrant complexion. The Plasmatic Effect is a rebalancing of fluids in the tissue once the Enzyme Masque is removed. This typically fades within 10-15 minutes, once the homeostasis of fluids has been achieved.
